

Detroit Data Intelligence Platform V2

Capabilities Overview

URL: <https://detroit-data-intel-v2.vercel.app>

Built by: Framework Real Estate Solutions

Last Updated: March 20, 2026

Database: 2,058,396 Records Across 12 Tables

Dataset	Records	Source
Property Sales	505,852	data.detroitmi.gov
Blight Tickets	872,697	data.detroitmi.gov
Assessment Roll 2026	388,147	data.detroitmi.gov
Trades (Mechanical/Electrical/Plumbing)	112,096	data.detroitmi.gov
DLBA Owned Properties	59,310	data.detroitmi.gov
Building Permits	43,830	data.detroitmi.gov
Rental Registrations	38,179	data.detroitmi.gov
Demolitions	16,089	data.detroitmi.gov
Presale Inspections	15,060	data.detroitmi.gov
DLBA Auction Sales	5,418	data.detroitmi.gov
Vacant Properties	1,417	data.detroitmi.gov
Contractor Directory	301	Built from trades/permits

All data sourced from Detroit's open data portal and loaded into Supabase PostgreSQL with full-text search indexes.

Interactive Map — 11 Data Layers

Toggle any combination of layers with time filtering:

Layer	Color	Records	Description
Sales	Blue	505K	All property transactions since 2011
Permits	Green	43K	Building permits with contractor, cost, description
Trades	Purple	112K	Mechanical, electrical, plumbing permits
Blight	Red	872K	Code violation tickets with fines and disposition
DLBA	Amber	59K	Detroit Land Bank Authority owned properties
Demos	Gray	16K	Demolition permits
Rentals	Cyan	38K	Registered rental properties
Crime	Dark Red	—	Incident data (2024-2026)
Vacant	Orange	1.4K	Vacant property registry
New Builds	Light Cyan	—	New construction permits
Foreclosures	Rose	33K+	Foreclosure sales + bank REO dispositions

Map Features

- **Time Range Filter:** 6 months, 1 year, 2 years, 5 years, or all time
- **Address Search Bar:** Type any Detroit address to zoom in (geocodes from our sales database with Nominatim fallback)
- **Heatmap Mode:** Toggle between cluster markers and density heatmap visualization
- **Multi-Item Popups:** When multiple records share an address, clicking shows a scrollable list of all items
- **Rich Popups:** Full record detail per layer — prices, dates, parties, permit info, violations

Investors Tab — 245,127 Unique Buyers

Track every property buyer in Detroit's sales history.

List View

- **Excel-style filtering:** Sort by total purchases, total spend, average price, recency
- **Date range filter:** Isolate investors active in specific time periods
- **Min/max purchase count:** Find everyone from 2-property flippers to institutional buyers
- **Paginated** with full-text search across all 245K investors

Investor Detail (click any investor)

- **Profile Summary:** Total purchases, total spend, sales count, revenue, flip count, neighborhoods active
- **Map View:** Green dots = purchases, blue dots = sales — see their geographic strategy
- **Flip Detection:** Automatically matches buy→sell on same address, calculates profit and hold time
- **Neighborhood Breakdown:** Where they concentrate purchases
- **Deed Type Analysis:** Arms-length vs foreclosure vs government vs family transfers
- **Full Transaction History:** Paginated purchase and sale records with complete detail

Example: Hantz Woodlands LLC

- 1,692 purchases across Detroit
 - 150 sales, 59 detected flips
 - Top flip: Fischer St — \$891K profit
 - Primary strategy: Bulk vacant lot acquisition from city (\$0 purchases)
-

Areas Tab — 203 Neighborhoods Scored

Every Detroit neighborhood analyzed and ranked.

Scoring System

- **Opportunity Score** based on weighted factors (user-adjustable):
 - Sales Volume (default 25%)
 - Median Sale Price (default 25%)
 - Permit Activity (default 20%)
 - Blight Rate — inverse (default 15%)
 - Rental Density (default 10%)
 - Demolition Rate — inverse (default 5%)
- **Score Weight Toggles:** Adjust weights to match your investment strategy
- **Time Range Filter:** Score based on last year vs all time

Neighborhood Detail

- Overview with recent sales, permit activity, top contractors, blight summary
- Drill into Sales, Permits, Blight, Trades sections (all paginated)

- Cross-link to contractor detail for any active contractor in the area
-

Contractors Tab — 301 Contractors

Full directory of contractors active in Detroit, built from permit and trade data.

Search

- **PostgreSQL Full-Text Search** with weighted ranking (name > specialty > description > neighborhood)
- Filter by specialty, zip code, proximity
- 124 contractors with verified phone numbers
- 81 with verified websites

Specialties Covered

- HVAC/Heating
- Electrical
- Plumbing
- Roofing
- Foundation/Structural
- Solar/Energy
- General Construction
- Fire Protection
- Elevator

Contractor Detail

- **Map View:** All permit locations plotted — see exactly where they work
 - Permit history with dates, descriptions, costs
 - Neighborhoods served and zip code coverage
 - Contact info: phone, website, business address
-

AI Chat — Claude Sonnet Powered

Natural language queries across all 2M+ records.

Query Types Supported

- **Contractor Search:** “Find a plumber near 48214” → returns ranked contractors with contact info
- **Investor Queries:** “Who are the top buyers in Corktown?” → returns investors sorted by activity
- **Neighborhood Analysis:** “What neighborhoods are growing?” → compares 6-month windows
- **Address Lookup:** “2404 Pennsylvania” → full property profile across all datasets
- **Growth Analysis:** “Compare East Village to Corktown” → side-by-side metrics

- **Custom Queries:** Complex questions routed to Claude Sonnet for intelligent analysis

How It Works

1. Keyword-first classification for fast common queries
 2. AI fallback (Claude Sonnet) for complex/ambiguous questions
 3. Executes against live Supabase data
 4. Returns formatted analysis with source data
-

Additional Capabilities

Lending Tab

- HMDA mortgage data analysis
- Lender activity tracking
- Loan type classification (conventional, FHA, VA, etc.)

Pipeline Tab

- Motivated seller scoring algorithm
- Identifies properties with distress signals
- Ranks by likelihood of discounted sale

Sources Tab

- Data provenance for every table
- Row counts and freshness indicators
- Download methodology documentation

Feedback System

- In-app feedback button on every page
 - Persisted to Supabase for tracking
 - Categorized by page and type (bug/feature)
-

Infrastructure

Component	Details
Database	Supabase PostgreSQL (Pro tier, 2M+ rows)
Hosting	Vercel (serverless functions + static)
AI Model	Claude Sonnet (claude-sonnet-4-20250514)
API Endpoints	30+ serverless functions
Search	PostgreSQL Full-Text Search with weighted tsvector
Caching	Vercel Edge (5-min TTL on heavy endpoints)
Health Monitoring	16 automated checks, weekly cron
Data Refresh	Monthly automated pipeline (1st of each month)

Investment Signal Layers

The platform enables multiple investment strategies:

1. Follow Smart Money

Track what institutional investors are buying. Filter by purchase count, date range, and neighborhood to identify where experienced buyers are concentrating.

2. Pre-REO Pipeline

Cross-reference assessment roll owners (bank names) with foreclosure sales to identify bank-owned properties before they hit MLS. Currently 440+ bank-owned properties identified.

3. Neighborhood Momentum

Use the Areas tab with time filtering to spot neighborhoods with rising sales volume, increasing median prices, and growing permit activity.

4. New Construction Signals

The New Builds map layer shows where developers are pulling construction permits — a leading indicator of neighborhood investment.

5. Distress Signals

Combine blight tickets, foreclosures, and demolitions to identify areas with motivated sellers and below-market opportunities.

6. Contractor Intelligence

Find vetted contractors by specialty and location, verified against actual permit history in Detroit.
