

Property Search Tool

Framework Real Estate Solutions — User Guide

Generated: March 20, 2026 | detroit-data-intel-v2.vercel.app

Overview

An AI-powered property search tool that scans 1,000+ Detroit MLS listings every morning, filters them through our "Dusty Turnkey" buying criteria, and delivers a graded intelligence report of the top 20 picks — with deal math, neighborhood analysis, and mechanical system checks. The system learns from your feedback: every thumbs-up or thumbs-down trains tomorrow's report to find better matches.

Access

Detail	Value
URL	https://detroit-data-intel-v2.vercel.app
Works On	Phone (Safari/Chrome) + Desktop browser
Daily Report	Auto-generated at 7:30 AM ET every morning
Tab	Click "Search" in the bottom navigation bar

The Daily Pipeline

Every morning at 7:30 AM, the system runs this automated funnel:

- 1 Wide Net — ~1,000 listings**
Pulls all active Detroit single-family, duplex, triplex, and quad listings from Redfin MLS.
- 2 Target Areas — ~589 listings**
Filters to Tier 1 neighborhoods (East English Village, Grandmont-Rosedale, Boston-Edison, etc.) and Tier 2 watch areas (Brightmoor select blocks, Core City, Fitzgerald, etc.).
- 3 Price Range — ~250 listings**
Filters to our \$50K-\$120K purchase range.
- 4 Grading — Top 20 picks**
Scores each property on price-to-value ratio, neighborhood strength, mechanical updates, listing keywords, and learned feedback. Grades: A (90+), B (75-89), C (60-74).
- 5 Enrichment**
Top 20 get listing descriptions scraped for mechanical keywords (furnace, roof, electrical, plumbing, water heater). Top 10 get permit records checked from city database.

What You See — Search Tab

Report Header

- **Strategy Table (left)** — Our buying criteria: purchase range, property types, cash-in target, refi timeline, required updates
- **Market Medians (center)** — Current median prices for Tier 1 and Tier 2 neighborhoods
- **Funnel (right)** — How many properties survived each filter stage
- **Feedback Summary** — What the system learned from previous votes

Property Cards (scroll down)

Each of the 20 graded properties shows:

Section	What It Shows
Grade Badge	A (green), B (blue), or C (yellow) + score out of 100
Address & Price	Street address, list price, \$/sqft, neighborhood tier, days on market
Mechanicals Checklist	Check or X for: Furnace, Roof, Electrical, Plumbing, Water Heater (detected from listing description keywords)
Deal Math	Purchase price, 20% down payment, estimated ARV, equity at ARV, refi cashout potential, estimated monthly rent
Positives & Concerns	AI-identified pros (updated systems, good location) and cons (no mechanical info, high \$/sqft, etc.)
Score Breakdown	Expandable — shows exactly how each factor contributed to the score

How to Interact — Vote on Every Property

Your votes are the most important input. They train the AI to find better properties each day.

Button	What It Does	Why It Matters
Interested	Saves the property for deeper research. Agent-X generates a full DD report.	Tells the system "find more like this"
Pass	Opens a popup asking WHY you are passing. Options: too much work, bad area, price too high, etc.	Most important feedback — teaches what to avoid tomorrow
Save	Bookmarks to the Saved tab for later. Does not count as a vote.	Use when you want to research more before deciding
Listing	Opens the Redfin listing page directly.	See full photos, description, and agent contact info

Saved Tab — Property Pipeline

All bookmarked properties appear here. Track each property through the acquisition pipeline:

Status	Meaning
Researching	DD report being generated — pulling comps, permits, ownership history
Offer Pending	We have submitted an offer on this property
Under Contract	Offer accepted, in due diligence / closing
Closed	Property acquired — moves to portfolio management
Passed	Decided against after deeper research

The Learning Loop

The system gets smarter every day based on your votes:

- Pass on a property because **"too much work"**? Tomorrow it penalizes listings without mechanical updates
- Like properties in **East English Village**? It weights that neighborhood higher in scoring
- Pass because **"price too high"**? It adjusts the price-to-value ratio scoring
- Both Jacob and Kwaku can vote independently — the system tracks who voted what

Bottom line: The more you vote, the better the daily report gets. Even a quick Pass with a reason is valuable — it takes 5 seconds and makes tomorrow's picks sharper.

Recommended Daily Workflow

- 1 Check the report (~8 AM)**
Open the app, go to Search tab. Today's 20 graded picks are ready.
- 2 Vote on each property (5-10 min)**
Scroll through. Thumbs-up ones with potential, thumbs-down ones that don't fit (always say why).
- 3 Review saved properties**
Check Saved tab for DD report updates on properties you liked.
- 4 Discuss in Discord**
Flag interesting finds in #dusty-turnkey-detroit for team discussion.

Current Strategy: Dusty Turnkey

Parameter	Value
Purchase Range	\$50,000 - \$120,000

Parameter	Value
Property Types	SFH, Duplex, Triplex, Quad
Target Layout	3bd 1-2ba, plumbing on first floor, single story preferred
ARV Target	Ugly house on thriving block — appreciation upside
Total Cash In	~\$50K (20K down + 10K polish + 20K contingency)
Refi Timeline	6 months, minimum \$30K cashout
Required	Mechanicals updated within 5 years
Preferred	Roof updated within 5 years
Avoid	Full rehab, foundation issues, fire damage, environmental, demos list

Target Neighborhoods

Tier	Neighborhoods
Tier 1 (Priority)	East English Village, Grandmont-Rosedale, Rosedale Park, Bagley, University District, Sherwood Forest, Martin Park, Morningside, Indian Village, Boston-Edison, East Village, West Village, Islandview
Tier 2 (Watch)	Brightmoor (select blocks), Fitzgerald, Core City, North End, Crary-St. Mary's, Cervený, Conner, Corktown (fringe), Woodbridge
